EZShapes®

Your JD Edwards data has a unique, visual identity. EZShapes® empowers you to construct your data to unearth new valuable insights. Import maps, graphics, and drawings that link to data from JDE applications and other sources to create visuals that help you better understand your business.

Out-Of-Box Versatility

- Operate in a web-based environment without any installations
- Alter graphics using slice, subtract, merge, simplify, and node edit tools
- Modify industry-standard shapefiles for any business need
- Create shapefiles from raster drawing formats such as JPG, PNG, GIF, or BMP
- Translate results into shapefiles, GeoJSON, or SVG file formats

Augmented Visuals

- Convert complex illustrations in one click using snappy raster-to-polygon scanning algorithms
- Spatially describe vector features with points, lines, and polygons
- Transform raster diagrams into shapefiles, usable in dashboards
- Reconstruct new or existing diagrams into functional shapefiles
- Build non-traditional geospatial diagrams

Interpret Data into Visual Narratives

By transforming your JDE data into a meaningfully visual context, the result is a fresh perspective that helps you uncover trends, see patterns, and identify new opportunities. EZShapes makes custom visualizations easier.

- Automatically traces existing images
- Simplifies existing shapefiles to reduce the level of detail for quick downloads
- Updates property annotations on shapes to reflect your data
- Allows manual editing and augmentation of shapefiles for drawings
